### DETAILED ACTION

1. In view of amendment filed April 5, 2005, claims 6, 15-28 have been cancelled.

Claims 1-5, 7-14 are pending.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 9, 11, 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Rokowski et al. (US 5,534,310) for the reasons adequately set forth from paragraph 3 of non-final office action of November 10, 2004.

*The invention of claims 1-4, 9, 11, 13 relates to a **method of making a composition** comprising reacting, in a reactor,*

*a. a **non-halogenated acetoacetate** group containing **monomer**,*

*b. at least one **additional monomer**, and*

*c. a **base**,*

Art Unit: 1713

***wherein at least a portion of the base is fed to the reactor during reaction, and wherein the base is added during the reacting step in an amount such that pH is not higher than 7.***

Rokowski et al. (col. 12-13, example 3 ; col. 17, claim 1) disclose a method of making a composition comprising reacting in a reactor, a non-halogenated acetoacetate group containing monomer in the presence of at least one additional monomer, and a base. According to example 3 of Rokowski et al., the base was added into the reactor during the polymerization process. Therefore, Rokowski et al. contain all the limitations of applicants' claims 1-4, 9, 11, 13. Claims 1-4, 9, 11, 13 are anticipated.

Regarding the claimed "base is added during the reacting step in an amount such that pH is not higher than 7", the recitation is equivalent to "base is added during the reacting step in an amount such that pH is equal or less than a pH of 7. Since Rokowski et al. (col. 13, line 12) clearly state that the pH is adjusted to pH of 7", the claimed invention is clearly anticipated.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. Claims 5, 10, 12, 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rokowski et al. (US 5,534,310) for the reason adequately set forth from paragraph 5 of non-final office action of November 10, 2004.

***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1713

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
